Dr. Van Laeken travelled to Dallas, Texas on March 6, 2019 to moderate surgery for internationally renowned Plastic Surgeon Dr. Rod J. Rohrich. Dr. Rohrich is serving as a Visiting Professor for the Canadian Society for Aesthetic Plastic Surgery (CSAPS) Annual Meeting October 4-5, 2019 in Vancouver BC. The CSAPS asked that Dr. Rohrich perform a surgery that could be filmed and shown at the annual meeting. Dr. Van Laeken was thrilled to serve as moderator for the surgical case. The procedures performed were face/necklift with SMAS, upper and lower blepharoplasties, facial fat augmentation and Juvederm to lips.

13. OTHER RELEVANT INFORMATION (Maximum One Page)

As an active member of the UBC Division of Plastic Surgery, I have regularly engaged with medical students in the third and fourth years of their training as well as junior residents of all subspecialties, senior residents of all subspecialties, and residents and fellows within the Division of Plastic Surgery.

The attached evaluations by students of my clinical instruction pertain to hospital teaching at ward rounds, teaching in the clinics as well as in the operating room. Didactic sessions have also been scheduled to encompass multiple topics in the area of Plastic and Reconstructive Surgery. The attached evaluations demonstrate teaching activities that are not only effective, but also appreciated and valued by students. I have produced presentations designed to be informative, concise and interesting so that the students are able to learn effectively. This includes techniques of instruction in the operating room; case presentations, formally and informally; as well as in the exam situation.

The most recent departmental review of the Providence Health Care, Department of Surgery, for which I have served as Head and Surgical Program Director during the past 10 years, identified that we have been able to transform our once struggling Department of Surgery to become one of the foremost surgical institutions in the province, both in the delivery of care and the provision of opportunities for students and residents to learn. I have been privileged to lead this transformation.

Within the departmental review it was noted that our institution is now one of the favored locations for all students and residents to obtain surgical experience and training. It has been recognized that many of the surgical residents now think that Providence Health Care is their preference for obtaining surgical education and experience on their rotations at PHC, which includes their excellent experience at the Mount St. Joseph's Hospital.

Through my tenure a number of academic surgeons have been recruited and a number of these individuals are performing basic science research. They have Master's Degrees in Epidemiology, International Medicine, and Education. Through the various roles and committees, for which I have attended in the last 10 years, I have had the opportunity to contribute directly to the recruitment and the search for new division and department heads. These new individuals will help shape the future of this Surgical Department, not only at Providence Health Care, but also at UBC.

I have included a copy of my last two departmental reviews with this curriculum vitae as demonstration of the work that has been done at our institution to promote academic surgery at Providence Health Care. I am gratified to see that the relationships between the academic institutions within the Vancouver Coastal Health Authority have improved which has clearly led to enhancement of the academic experience of the residents and their relationship with UBC between the two sites.
